STUDYING IN PARIS

PROGRAMS

FOR INTERNATIONAL STUDENTS AT ECE PARIS

As an international student, there are several pathways you are able to follow in order to become a student at ECE Paris. Depending on your educational goals, you are able to apply to ECE Paris as either a “non-degree seeking” student or a “degree seeking” student.

NON-DEGREE SEEKING STUDENTS

Non-degree seeking students enjoy a summer or/and a semester, or a year at ECE Paris, and are returning to their home institutions to complete their intended degrees.

DEGREE SEEKING STUDENTS

Degree seeking students spend two years at ECE Paris to follow one of the specializations proposed by ECE Paris to obtain the ECE Paris Master’s degree (the Engineer title) accredited by the French Ministry of Higher Education and Research and the European Council.

SUMMER STUDENTS

MASTER’S STUDENTS

SEMESTER/YEAR :
- EXCHANGE STUDENTS
- VISITING STUDENTS

DOUBLE-DEGREE STUDENTS

ECE international

ECE international is an ECE Paris student association which helps integrate international students into Paris life. Our objective is to help students adjust to their daily life when they come to Paris. Four words accurately define our daily work with the students: gatherings, presence, work and companionship.

NON-DEGREE

SEEKING STUDENTS (UNDERGRADUATE LEVEL)

SUMMER STUDENTS

ECE Paris offers summer programs in July in the following areas:

- Energy and Environment (9 ECTS)
- Augmented/Virtual Reality Sensors and Networks (8 ECTS)
- Smart Objects (9 ECTS)

The Summer students come from the following partners or by the following means: Erasmus partners, Laureate International University partners, International partners (outside of Europe), Independent candidates (from non-partner institutions).

SEMESTER/YEAR

Exchange Students

Exchange students are students coming from a partner institution where there is a specific exchange agreement. They normally attend ECE Paris for either one semester or for one year.

ECE Paris Exchange students are coming from one of the following partners: Erasmus partners, Laureate International University partners, International partners (outside of Europe).

Visiting Students

Visiting students are students attending ECE Paris for one semester or a short-period of time and they are coming from a non-partner institution. They are able to participate in courses designated for the “visiting students”. They obtain a transcript of grade. The objective of the visiting students is to gain exceptional cultural and educational experience while attending ECE Paris.

Program and Courses

Visiting and Exchange students are able to apply for either the Fall semester (September to December) or the Winter/Spring semester (January to June). The following are the courses the visiting students are able to participate at ECE Paris. The program and the courses are fixed for the visiting semester:

Courses	Credits	Teaching hours
Algorithm-C	8 ECTS	6
Operational research - Applied Mathematics	8 ECTS	6
Digital Electronics	8 ECTS	4.5
French as a foreign language	6 ECTS	30

DEGREE SEEKING STUDENTS

MASTER'S STUDENTS

International students who have successfully completed an accredited Bachelor's degree in Science or Technology outside of France are able to apply for the ECE Paris Master's degree program. The complete program duration is 2 years (4 semesters) and a mandatory internship placement is included in the program after each year.

DOUBLE DEGREE STUDENTS

Double-degree students accepted into the specific double degree programs by ECE Paris and the partner institution. The students obtain the Master's degree from ECE Paris and a degree from the partner institution. In order to obtain the ECE Paris Master's degree (the French Engineer title), the students must spend at least three consecutive semesters at ECE Paris. Most double degree students spend 2 years at ECE Paris in order to complete their internship semester and Thesis.

The specializations offered at ECE Paris are as follows:

Specializations	1 st year of Master's Program		2 nd year of Master's Program	
	Taught in English	Taught in French	Taught in English	Taught in French
				
Embedded Systems	x		50%	50%
Energy and Environment	x		50%	50%
Telecommunications and Networks	x		50%	50%
Information Systems	x		x	
Quantitative Finance		x		x
Health and Technology		x		x
Transport and Mobility		x		x

ECE PARIS, SINCE 1919

Training men and women to become experts in key sectors of the economy

ECE Paris trains non-specialized and high-tech engineers eager to contribute to the major societal challenges of today and tomorrow.

During their studies in France and abroad, ECE Paris students acquire expertise in the major sectors of industry, manufacturing, energy, construction, transportation, trade and distribution, finance, insurance, administration, health, education, culture and media.

ECE Paris Master's degree is accredited by the Engineering Education Commission (CTI) and by the European Research Council (erc).

ECE Paris is a member of the Conférence des Grandes Ecoles (CGE, an elite association of business and engineering schools), of the Laureate International Universities, the CDEFI (an association of French Engineering directors), the UGEI (Union of Larger Independent Universities), Paris Development and Campus France.

The school's philosophy: Innovation and Entrepreneurship

Attentive to the evolution of the job market, ECE Paris offers specializations that are highly demanded by the employers.

Each year, the school creates new programs and modifies a few by integrating emerging technologies and key societal challenges such as the issues of energy, transportation, risk forecasting, environmental protection, and new health practices. As proof, 25% of the current curriculum did not exist 4 years ago.

ECE PARIS KEY FIGURES

2020
student population

800
business partners

350 faculty and professional teaching staff

7 technological and industry Majors

7 professional Minors

11 in-depth study electives

3 research laboratories + 1 incubator

€37,600
average gross annual starting salary

6900
trained engineers (alumni network)

60% of the engineering students study abroad

12 months
average study abroad, period in at least two different partners

83 international partner universities in 33 countries

32 technological, sports, humanitarian, and event-creating clubs and associations

5 000 internship offers received each year

12 to 13 months professional experience in France and abroad

A BRAND NEW CAMPUS

The main Paris Eiffel campus, being well situated, modern, open and connected, facilitates the intervention of French and international professionals, conferences and business meetings. The campus is organized to combine academic success with quality of life.

- Modern infrastructure a steps away from the Eiffel Tower
- Garden courtyard
- Lecture halls accommodating up to 400 students
- Wifi access
- Cafeteria with a patio
- Student lounge areas
